SUMMARY KEYWORDS

Psychokinesis, mind sight, precognition, remote viewing, side games, psi community, emotional connection, training methods, telepathy, extra sensory perception, flow state, intuitive perception, stargazing events, spirituality, competition., America Stonehenge, archaeoastronomical alignments, Dennis Stone, ceremonial site, stone structures, Native American connection, astronomical center, bedrock quarrying, stone tools, archaeological digs, solstice alignments, historical significance, visitor center, virtual tour, equinox events., America's Stonehenge, Serenity Garden, weddings, birthday parties, live podcast, Curious Realm, UFOs, UAPs, cryptozoology, paranormal, field observation, scientific data, Ground Zero Media, podcast services, Roku devices.

SPEAKERS

Speaker 4, Speaker 2, Speaker 5, Speaker 3, Speaker 1

Speaker 1 00:04

Attention! Attention! You are listening to a pre-recorded episode of The Curious Realm. Curious Realm is busy traveling the vast void of time and space to find the best paradigm-changing content the universe has to offer. Enjoy the following transmission, and remember: stay curious, curious, curious. Coming to you from the city of the weird, exploring topics from the esoteric and unexplored to dimensions unknown, shining a light of truth on the darkest corners of our reality. Welcome to the Curious Realm.

S

Speaker 2 01:12

Well, hello everybody, and welcome to this week's episode of Curious Realm. So glad to have you here. So sorry that we are here in this is the time of year where we have numerous shows that we go out that we travel to, and that I that I also have numerous clients that I am out traveling for. So right now I'm out working the amazing Keller Williams show in San Antonio with an awesome crew. Love working with those guys with Shepherd, all kinds of fun stuff. But our guest tonight, in the second part, we are very happy to welcome back our good friend and guest Dennis Stone, talking about America's Stonehenge, an enigmatic spot in New Hampshire that archeologists have yet to figure out. Paleontologists have yet to figure out. Even even local natives, the the Native American people from the area do not know where it came from. It was there when they got there. So we'll be talking with Dennis Stone about some of the latest discoveries, some of the archaeo astronomic alignments at America's Stonehenge and more. In our first segment, I am proud to welcome Psy Games winner. Here's a little bit of the B-roll from Psy Games, folks. This is the Psychokinesis competition. Our guest Ryan Debyen competed in this as well as dowsing, and there were so many competitions. Ryan, welcome to the show for the first time. How are you today?

S

Speaker 3 02:49

I'm doing amazing. How are you, man? It's it's it's crazy because because we just saw each other at the side games, and you know, honestly, man, I know it's only been like like literally, I think just over a week since side games ended. Man, it feels like it's been a month with all the stuff that's been happening between now and then. And man, it's. I just want to say first off, your kid's amazing. Thank you. Same. Loved hanging out with him, and he did amazing on stage. It was. It was such a proud Papa moment for both of us. I think. And dude, it was. It was so good. 2026 was so good. It

S

Speaker 2 03:22

was an amazing experience, and truly, I say it regularly on the show, Ryan. I belong to a lot of research communities. Everything like I'm speaking at MUFON at the end of the month. I belong to paranormal research communities. I belong to cryptid research communities, as opposed to all of those, where there is some sort of inlaid drama, where there is some sort of fighting in the background about trying to get a data drop on somebody, or or trying to get ahead of somebody else's research, or trying to release before anybody else, that is not what the psi community is about. Like whatsoever, even whenever it comes to competition in apps, like the creators of Social RV talk with the creators of the ARV app. You know, like it's it they they share data. It's it's one of the most amazing and beautiful communities, and truly, like you were saying, the the side games community specifically this year it was 900 people came through the doors, and that's almost double what it was last year. Which, even as somebody who works in events, that's pretty fantastic to see. Almost a double growth in one year. But in addition to that, to see the camaraderie, the community that was built, the people that were talking with each other outside in the vendor areas, things like that, while while presentations and even games were going on, it was really awesome. So I want to thank you for coming and competing for your second year, and for the second year, for the second. Year you walked away with first prize in psychokinesis, so let's let's kind of dive in real quick because we've had David Tran on the show. He was one of the perceptualists this year. He was competing against you in in psychokinesis, and it's interesting because there are people, there was a person competing this year who won, who won second place, who came last year as a as a total debunker. Yeah, he he came and was not a believer. His his lady competed, and he was like, "Oh, this is a bunch of BS, and his mind was changed. And in one year learned enough to be able to qualify and compete and win second place. You know, so yeah, it's wild. There are people in the in the games who like you and David are kind of naturals. You don't you don't really practice. You haven't gone through any specific training in that kind of way. I

S

Speaker 3 06:02

knew about the not practice. I'm just going to throw that up. I practice all the time, but that's true. No, no specific trainings with any sort of professional. Just just homegrown.

S

Speaker 2 06:10

Yeah, yeah, and and that's true. You do practice. I mean, honestly, you're some some of my favorite online videos regarding mind site. Are you like like jumping ramps on motorcycles and stuff like that blindfolded, like it's it's pretty incredible, man. So thank you

S

Speaker 3 06:26

for mentioning that. Most people don't remember that, but yes, thank you for mentioning that, dude. That was that was like the scariest thing I've done with all this stuff so far. It wasn't just like a jump; it was like a full on like metal FMX ramp, yeah, to wear into a to a flat lip essentially with a half pipe that we use for our bicycle. So if you come up short, you're you're in a bad spot.

S

Speaker 2 06:48

Yeah, yeah, yeah. With the

with the the mind fold and the helmet bag and yeah, dude, it's it's it's crazy, right? Like you know, it's it's it's so crazy for me just because I you know a lot of people know my backstory. I've had a near-death experience. I'm I've been like basically a career social worker. Seen a lot of death. It's just you know I've had kind of this weird eclectic background that kind of gave me just the right kind of psychic soup. I guess would be the way to put it to kind of make me have a little bit of a more natural ability to kind of connect with this stuff, dude. I don't know if you saw my shirt, dude. I love all the cryptids and the like gups and the like. We're doing our sky watching events now that we have a sponsor for as well. 1000 blindfolds is actually sponsoring our sky watching events where me and Justin from Rice Over Loveland have had crazy sightings. I think I think they they definitely like to hang out at our parties, is what I'll say. But yeah, man, it's it's just it's been a whole crazy thing, you know. And then I find out about the site games last year in April. I kind of do this like coming out video to all my clinical people, all my race people, because I I raced you know through last year when I retired, everybody kind of thought I was crazy and kind of losing my mind. They are they already knew I was a little bit crazy doing all the motorcycles and stuff, but you know now I think that kind of sealed the deal for a lot of people. But you know we start training, we post all the trainings. You know what I mean. We were we were kind of showing our process and showing people not only how to do it, you know, in kind of a free manner, but also kind of showing you know my processes. I was building going into the side games. Psy games last year was life changing. I qualified for all the games in terms of the testing, but just based on the amount of people and what they were trying to accomplish with the side games as well, I only did three. I podiumed in all three of the ones I did last year, so I got first in psychokinesis, second mind sight, and second in precognition to David Tran. And you know, it's it's it was it's just been this building, right? We've continued to train. We didn't stop training. I wasn't done at one. I wanted to come back at least this year and defend my title and show that like it wasn't just a one-off loop. Like I train. What I say is what I say, and what I do is what I do. And I'm I'm no joke, right? Like there's no magic here. I know I know Chris Ramsay's kind of throwing some shade of mind sight, but it's hard to it's hard to dispute precog. It's hard to dispute you know psychokinesis when it's in these really controlled environments. And I want to be that guy that shows everybody like time, energy, and effort. That's that's like what it takes to really get into the to being able to do this consistently, do it on command, being able to show people, you know, that we all can do it with time, energy, and effort. It's you know, it's for me, it's connected to this orb phenomenon that that has just always kind of been a part of my life, along with kind of the spiritual aspect to it, you know, and it just it. It's all been flowing together over the last year. You know, we we we we posted all of our events. I ended up being asked to go to be one of the trainers at one of the intuitive perceptions for the side games. Me and David Tran killed it in every aspect. Like we we set the record at 300 yards for Mind Sight, and I don't care who you are. We have videos of it. They were having to walkie-talkie and phone call each other because they couldn't even hear each other. You know, besides you know, visualize the small cards we were using.

S

Speaker 3 10:32

I, you know, I was saying that they're about the size of the Amazon Zenners. This is my new retail section over here. But Amazon Zenners are are this is this is them in their package, right? So at 300 yards, you can't even see that it's red, right? Yeah, and I'm only about maybe 10 feet from the camera. I guess I guess my point is at 300 yards, you're it's it's hard to dispute that there's you know if you want to say it's mind sight, if you want to say it's precognition, but there's some sort of extrasensory perception that's going on with me and David. That's next level, right?

S

Speaker 2 11:07

At 300 yards, just as a trained cameraman, just so you know, folks, just shy of end zone to end zone of an NFL stadium. So consider that to begin with seeing seeing seeing the color of something like this at 100 yards to begin with, unaided, no no telescope, no binoculars, no no. Let me zoom in on my camera, much less blindfolded at 100 yards, and this this is like about the size of two. It's about the size of two packs of cigarettes for those asking. Maybe about two playing cards stacked next to each other. So so not incredibly large. Okay, so whenever you're talking about that at 300 yards to begin with, I don't care if you don't. I don't care if you have no blindfold on, Ryan. I'd give somebody 10 bucks if they could tell me the color of that card dependably at 300 yards.

S

Speaker 3 12:10

Right.

S

Speaker 1 12:11

Period. Period.

S

Speaker 3 12:12

We we we we had this amazing training. I met these amazing people. The venue where we did the training was was next level, you know, with Michelle Freed and Kemla and Hakeem and and just all the other people. It was it was just truly this crazy experience, right? And you know, my I'm a goal guy. I'm a moto guy, right? Like I like goals. So my goal of going there was knowing that they were going to have the property to set some sort of a distance record with David, you know, just keep keep pushing that bar higher and keep trying to make it harder for haters to to have you know ammunition, right? And and so we we do that. I go to contact in the desert. You know, it's funny. I was talking with my son Axel and and my wife and my trainer, and I'm like, guys, like, what can we do? It because Akim had let me know that you know he had asked me to be a contact in the desert. He's like, well, what do you want to do for your thing? Or you know, we don't know if we're going to be doing it as kind of a group or if we're just going to let everybody kind of do their own thing. And I think with with Sean and Dalia kind of doing their own thing, Pat kind of had their own specialty. So we all just kind of took our turns doing our doing our mindside demos at Contact in the Desert. Man, I wanted to get you know pattern recognition, reading colors,

S

Speaker 2 13:25

yeah,

S

Speaker 3 13:25

task completion, and navigation. Right, those those were the things that were really important to me. And so I did this crazy runaround in less than five minutes, where I you know I don't know if you're I don't know if your kids familiar with like Dude Perfect. It's like this channel where they do stick and ball sports and they'll combine them into these new games, and I kind of did this thing where I ran around doing different challenges, trying to do it in under five minutes, which I did, just to show everybody. You know, once again, there's cameras on you. I literally went in people's faces to be like, "Can you please check this midway? Keep, you know, keep me legit. If you think I'm cheating, just call me out on it. You know, and did it up, and it was amazing. And I met all these amazing people there, and kind of you know started off talking. I mean, you know the intuitive perception and and and contacting the desert is where I was first introduced to Flow State with Akeem and the side games online. I mean, there was times at the intensive where, like you know, we we would end around nine. Really, I think the whole thing was supposed to end around six, but everybody was just still so charged up and what. We end around nine, and then you know nobody was you know we were still all charged up even when we went home. So Haki would bust out from like nine to 11. He busts out the flow state machine, and you have all these you know high end practitioners is what I'll say. Yeah, doing this stuff, and it's like, man, it it just felt like being an X med school. It was it was just such an amazing experience, and you know, games shown shown a lot of it. But there's you know, there's multiple games to that thing too, where you're using your consciousness to. To drive stuff, you know, and it's it just it's been mind blowing, man. And and then you know we we do contact in the desert. It's it's amazing. We come back. We're doing our stargazing events. Those are blowing up. You know, this whole time we're trying to teach people. I have these both weekly and biweekly meets that I've been doing with people, just trying. I've been not charging anything, just trying to get people involved and get people psyched about it. Get people, you know. One thing that's been really important to me with all the social media stuff and doing the kind of more crazier stuff that's hard to dispute is I just wanted people to be inspired. You know, when when I see a person do something amazing on a dirt bike, there's this part of my soul that's like, "Oh my gosh, I want to ride! Right? When when when I watch people have their mind cycle open, you know, for the first time or or the first time they get like three sets of three of the Zener cards, where you're like, "That's pretty amazing. That's like basically 10 in a row. You're sitting at nine right now. We we do them in sets of three, but it's amazing. They're just the look on their face, man, and and then it's like they feel it in their heart. And when they feel it in their heart, that's that's the moment where like you can really open up those psi abilities. That that just moment of joy and happiness in your heart, man, is where it all comes from. And the side games is such an amazing producer of those emotions, and it just charges everything. Dude, I'm pretty sure the electronics. You know, me and David both affect electronics. I'm pretty sure it's like a common thing, just because we give off such. You know, we're. I think

S

Speaker 2 16:35

he broke my recorder.

 Speaker 4 16:37

Yeah, dude,

 Speaker 2 16:38

it's working now, but it completely froze up and did absolutely nothing while we were trying to record at Psygames,

 Speaker 3 16:46

dude. You have all that. There's like

 Speaker 2 16:50

five shows in that thing, so it's not like it's like beat up and running around all the time. Yum. And and I've I've got my own experiences. I have my own things. Like I normally show them on air, but my bent silverware, my and I, I literally just had wrist surgery on both hands and both elbows. So when I did this, even now I couldn't like manually bend a spoon if I tried to. It would be way too painful for me to do, Ryan, but to see my son do it, to see my son in literally in one week, the week before Psy Games, he was doing his online training, and he has a little sheet that he does with his stuff: how many, what game, how many misses, how many hits, what other

 Speaker 3 17:37

data? You know, that's how you do it.

S

Speaker 2 17:39

Well, and and things like physiological data, did you get a rapid heartbeat? You know, did you start sweating? Like you know that kind of stuff. You know, like I want him to learn that while you're applying this, you should be getting scientific data too. You know, you should be gathering that data because you have an opportunity to, and to see him hit 10 out of 10 on incoming, which is a precognitive game, where he got 10 out of 10 right, and he was psyched, man, to see him go from that the week before to walking on stage blindfolded at Psy Games for the panel, and then to see him afterward at my cousin's house in Lafayette, where we I was just like, hey, yeah, you know, give me a deck of playing cards, and he started calling the color. Okay, that's 5050, and then he started calling the card, and it was like, oh, dang, homie can read. I was given in Tide boxes. I was given like he's never read the back of a can of wet cat food. He read it word for word, and it was like, "What is this? This is crazy! But he can do it, and it's it's fascinating because he had a party this weekend, man. And I was like, "Show your friends! And we started doing it. They were surprised, but then they were more surprised when we started taking Coke tabs, and I was like, "Take it, take it right off the can, guys! Take it off the can and stick it to the wall.

S

Speaker 4 19:09

Yeah,

S

Speaker 2 19:10

we have Coke tabs that have been sticking to a door at the laundry room in our house for three days, man, and that door's been opened and closed at least 10 times to a dozen times. They're still on there, you know.

S

Speaker 3 19:23

It's it's so amazing. My my wife had never stuck a fork to anything, right? So we were at one of the content creator houses on Friday, and she's got a penny to stick. She got a fork to stick, dude. My my son, dude. I don't know about you, but those Bombay big gold forks that they give the gave the people to bend at side games. Yeah, those are no joke forks. They were big. Those are big forks. And when Axel brought his up to me, he's like, "Dad, look at what I bent. He was so proud. I'm like, "Dude, that's the thickest fork I've ever seen. You know what I mean? Yeah,

S

Speaker 2 19:55

yeah, and and yeah. I mean, there it is with the with the fork stick. Into the wall, right there. My

S

Speaker 3 20:02

wife was losing her mind in that moment, and everybody was losing their mind for it. And dude, it was that moment of fun, right? All the people were trying, and it was just like it was just it's just one of those moments where, like, dude, yes, she got the stick, but the like the the house's energy just skyrocketed when she got it, a few other people got it. We were all losing our minds, and it's it's that energy that the side games brings. You know what I mean? And it's it's it's it's something. You know, for me and Moto, dude, it's it's amazing when you send a new jump, when you win a race, but when you do it with your friends, when your family are there, it's something completely different because it's like you know it unlocks something new within a whole lot of you know different people that are seeing it. You know the 100th monkey or whatever it is too. You know as much as as much as it's amazing for me and my family, and you know I'm sure you know everybody. I know it was a proud papa, and you too, man. We're seeing our kids doing it. We're the the people in the crowd are seeing our kids do it, right? Yeah. It's it's it's opening up all these levels, dude. You know, my Moto community is pretty Christian and pretty conservative, and that's just kind of how Moto primarily is. That's not everybody, but that's a lot of it, right? And you know, you have this moto dude from Colorado who's pretty much love and unconditional positive regard, but not really religious. Kind of showing people that you know you can do this stuff, and it's not woo woo. We're not doing seances. You know, it's really like training a muscle. I I know I watched David's where he was talking about it being an extra sense. It is your sixth sense. It's extra sensory perception, right? It's ESP. It's we're not, you know. Maybe we are kind of tapping into this bigger collective, but it's not in any sort of a negative way. It's something that we all can do, and it's something that with training, you know, you can do it. I literally have shown it from from the start, you know, and now have a back to back record of showing, you know, the time, energy, and effort can work to get these. You know get the results you're looking for, no matter what it is. You know if it's if it's something personal in your life, or you're you're setting aside that time to learn a new trait, like sigh, or man setting aside aside the time to to make sure you're having the relationship with your family and your kids. And you know we, dude, I don't ever sleep. I live off coffee. This is the first time I don't have a Dutch Brothers with me, but you know, dude, I live off coffee just because you know we get one shot to dance, dude. We get one shot to live this life.

S

Speaker 2 22:33

Yep.

S

Speaker 3 22:33

And man, I do know what it's like to be on the other side, and I've had you know just so much death in the last five years, it's like I want to relish every moment, take advantage of every opportunity, and just show people and inspire people. Because you know, when I leave, I I know that there's going to be people that love me, man. But the more that I can spread my love, the more that people are going to love each other, and it's just going to have the ripple effect to to you know the butterfly effect of that, and that love legacy, and just wanting to help people, man. That's the goal, and so that's why we've done everything up to this point free. I think that has to change a little bit, just because our events are getting way bigger. So it requires, you know, instead of us all just renting 100 bucks, now it's going to be like 1500, and that's like a whole big thing. But it

S

Speaker 2 23:21

changes inspiring. You know that I think that's one thing that a lot of people maybe don't understand when it comes to growing anything, Ryan. Growing, growing even any kind of movement is at some point organization and money has to be involved. There's there's one of two things. I used to speak at podcast conferences whenever I had my podcast consultancy and my podcast network, and I would typically come in and have everybody get up, stretch, say hi to your neighbor, things like that. Now show me your jazz hands, everybody. And every time I say time or money today, you show me those jazz hands, all right? Because that's what it is-it's time or money. And if you want to grow something, you need one of two things: you either need time or you need money. If you have time and no money, buddy, you can learn to code WordPress, and people will forgive you. You can you can hack your way through the jungle and grassroots everything, and that's okay. But eventually, it'll come to money. You know, it's the only way that you grow past the grassroots of it is money. And if not, then you need money from the jump. If you don't have time to grow it and grassroots it, you know. So one of the two is going to happen, and it takes one of the two to make a movement happen and to to get these kind of things off the ground and to to even begin spreading this message on a mass level, Ryan, because it's it's hugely important, I think, for us. All of us who are a part of these communities, I think that there are lies, especially myself as a host. I try to explain to other hosts we have an onus placed upon us to clarify things. We can we can hypothesize, we can do all kinds of things, but what we can't do, and what I try to explain to people that my show's job is: there are tons of people around the around the watering hole digging rabbit holes, and they're fun to go down. They're enjoyable, but the problem is there's a bunch of dirt kicked up, and it all lands in the water, and we all have to drink from that water. And at some point, somebody has to start filtering it so we can all have a good drink, you know. And when it comes to these things, like you're saying, there are a lot of people that misunderstand. Last year, and any show that I go to, any show that I go and cover, I always pay for a boosted ad to help sell tickets. It's just part of what I do, well, I paid for a boosted ad. I did not lock down the comments, Ryan. And probably about a month before the show last year, I saw an alert from my brother that was like, "Oh, you know, Randy Jordan has has commented on your post, and I was like, "Oh, which which post did he comment on? And it was my side games ad. And his only his only comment was the comments thread here is gold. And I was like, oh crap, man! What the heck have people been saying about the my God? It got deep and thick quick. Everything from this is this is the work of Satan to to yeah one person was of course quoting John's revelation and I was like as a former seminarian I find it very interesting that you're using John the Revelator to to make your point pretty sure he may have remote viewed the end of time

S

Speaker 4 27:00

it's

S

Speaker 2 27:01

but it's it's been

S

Speaker 3 27:02

hard, man. It's been hard because I I feel you on every moment. I do. I I caught I caught it in person, um, in a way that I probably won't describe. I caught it in person live. Yeah. Um. But dude, the hater comments and just the the like you were saying, man, the total misunderstanding. You know, and even from the scientific community, you know what I mean. Like to some degree, it's like you know we were we were talking, you know. So I made these mind side masks. They're completely sealed in. You're you're locked in. You're painted in. I call them the Iron Man mask, or the the nightmare mask. But dude, it's it's trying for me to put down the haters, right? To give up less ammunition, and and I and also to to kind of take off that woo woo. You know, like don't get me wrong, I I believe in spirituality, and I believe

S

Speaker 2 27:51

absolutely.

S

Speaker 3 27:52

You know, I I believe that like we can connect with spirits. I believe that we can connect with extra dimensional entities. I believe that orbs have probably a consciousness to them, you know what I mean. And whether and I, I think personally, I think there's there's spirit orbs that are more connected with Earth and our surroundings and our our life here. I think there's like you know the orbs that come from outer space are more you know I'll just say I'll just say the space versions. Yeah, yeah. Earth versions are space versions, you know, because I don't know. I don't have the answers, and I don't claim to, but I have a lot of experiences that I like to share with people to help get to those answers, right? And I think for me, that's what what's been really important, you know. I I I've talked about it, I post about it. I'm I'm gonna once again, I I gave you all the cool details, but I won't give out on this. But you know, once again, what's been really important to me is to be the trophies and receipts psychic, man. And I, I, if I don't say, if I, if I say I can do it, I can do it, and I'll show it. If I don't say I don't have it, I don't have it. You know, it's just not there yet. And so I actually went and did three days of testing post Psy games in North Carolina with some with some different folks from around the world. I won't say exactly who was in the group, but it was a pretty elite group of folks that can produce on command, is what I'll say. And man, I got amazing results. I asked for my results. I'm once again. I want to know how I was doing. I don't. I don't think everybody got the results, but I know. I know a handful of us did. I did amazing. I won't give away the details of the data, but I did amazing. I did not get 100% but I got gosh darn close is what I'll say.

S

Speaker 2 29:29

Hey, as long as you're shooting above 60, 70% you are well above the the average of guessing, and you are well above the median of just probability of landing on the answer,

S

Speaker 3 29:44

you got it, man. And what I'll say is, is you know, probably probably one person that you would expect to do really well, just kind of based on their situation, did amazing. They're the only one that aced it, and then there's a there's a couple of the rest of. That did amazing, and then not everybody shared their results, which is completely fine and completely reasonable. But you know, it that was just as impactful for me as the side games because it was like you know I kind of described to you some of the things that we were doing and what was being asked of us, and it's you know and one thing I've heard, kind of, from a lot of folks that did reviews about the side games, you know, I'm watching all the side game stuff. I want to see what's happening. There wasn't the wow moment like we got with Dahlia last year. Basically, that's what everybody was saying. Is there wasn't the there was a lot of amazing moments, but there wasn't the moment that stood out like Dalia in her mind side demo, going off the stage, off off into the crowd, doing two at a time. You know what I mean. That was a that was a moment, and then her with Lido doing the telepathy. Those were both moments I think really captivated everybody, and I think just kind of on on the functional side, just with the way that things were moving in terms of timing, there just there wasn't the there wasn't the time for those moments. I guess is the problem is what I was hearing, and so plus I think everybody wanted to be wowed, and you know what I'm learning from these scientists, and and from what I'm hearing from the crowd, and you know me, dude, I'm the I'm the dude that wants to keep pushing the limits. Everybody wants to see the person that can get to 90% I'm not going to say I'm ever going to be 100% dude. Professional basketball players that shoot at that basket today. Absolutely. That being said, I want to you show me Shaquille O'Neal's free throw average, dude. Exactly. You know, I want I want to be the dude rolling into next year that can get like you know 85 90% on precognition, where maybe it's behind a wall or a board, so it's still in the vicinity where everybody in a room could see it. But it's not at all visible to me. Maybe I'll be wearing a mask, and there'll be a wall. Or you know, I'd already been working on that with like weird technologies because I had had this MMA guy who I found out too. Actually, didn't just call me out. He called out David Tran as well. I didn't know that till till this till this till this you know past experience, but just also also that just tells me that that dude's probably just trying to ruffle feathers compared to trying to prove a point. But

S

Speaker 2 32:11

well,

S

Speaker 3 32:12

I can prove it. I can prove it more through the scientist than I can through that guy. You know what I mean? So

S

Speaker 2 32:17

and you know that that's honestly what it comes down to Ryan is the fact of you. You have to prove nothing to nobody to begin with. There's there's no reason for you to have to please any. And just so you know, folks, skeptic right here, fully, fully skeptical about everything in the world. Even my own experiences have no problem being skeptical about it, like like I said, I've I've got like four or five aluminum pull tabs hanging on my door outside right now that I put there. Would love to be able to explain it. It's on it's on a hollow particle board door that definitely ain't magnetic or has nothing magnetic inside of it, and it's aluminum, so it's not magnetic. So I'd love to be able to scientifically explain that. Can't, just strange, weird. Quarters do it. All kinds of things. So the the thing is, as a skeptic, you're supposed to be looking for the data that changes your mind. You aren't supposed to be looking to debunk everything. There's there's a difference there, and when it comes to science, especially, you know, they if you say you have evidence, they are going to eviscerate you. That's their job: is to poke holes with rapiers into things called evidence and see if they still float, Ryan. However, if you come to them and say, "I've got some really weird anomalies here, I'd love to have them examined. That's a different story, and they come at it from very much the same aspect that these scientists did, examining you and David and other people. You know, the idea of how do we quantify this, and like you said, the fact of their want, the expectation is for that 100% you know, but but you've got to give the anomaly the room and the credence that it deserves when when you're still banging out a 75 to 85 percentile, and and that is well over average, and that is well beyond just random chance to be to be averaging that, you know,

S

Speaker 3 34:32

dude. It's it. What I'll say, I won't. I won't give too much more because I want to be real careful because I, you know, already everybody knows. But what I'll say is, we used progressive masks that went all the way from our mind folds through you know what was you know once again my mask is pretty extensive it covers your whole face. What I will say is we ended up in a helmet that was much bigger. Yeah, and so you know it it was it was amazing and that. You know, just on my heart, man. Just to know that I got to be a part of that, be part of that group. I I had an amazing time. I want to say more because there was just so much more to it. But I'm just going to probably end that portion of it there. But it's where

S

Speaker 2 35:16

you have to end it. There are NDAs involved. There's science involved. All kinds. Everyone that was there

S

Speaker 3 35:22

that last night with the camaraderie is what I'll say, and and ending on the on the music is what I'll say. Man, that I will never get to not live that moment. I'm so happy that I get to remember that in my heart, because man, that that was powerful.

S

Speaker 2 35:38

Well, and let's start getting into that real quick. Let's start getting into the the feelings that come from it. Where this source is from for you, Ryan? Because and the the only way I can grasp it, the only the I guess I I have been somewhat somewhat emotive in life, you know, where where I've been able to empath what people feel, things like that. But aside from that, I do some remote viewing. I am I am no precognitive. I guess I can pre cog tech issues, like I can, I can call that pretty pretty rapidly. Like this will, given this situation, this will happen. Like, call I guess you can call me a prophet in that way because I always give an option out.

S

Speaker 3 36:34

Pattern recognition, man. Pattern recognition. If we

S

Speaker 2 36:36

if we do this, this likely will not happen. But but in the same right, some of that yes does come from ethereal places. Like I just I see it and I see the situation happen, and I normally take a circumventing path. You know, like oh no, I see this is going to happen. I'm going to bring this spare piece of gear just in case. But but that all sources very naturally. None of it comes from any kind of training except remote viewing. And even then, only in the last year has it become the fact of synesthesia has set in in some ways, like with the ideogram, for instance. You know, just so you know, folks, in protocol-controlled remote viewing, you use what's called an ideogram, and it's basically just a subconscious squiggle on the paper. Go wherever your hand's moving, and then from there, you touch and synesthete things from the ideogram. You touch the ideogram, you feel it. You move your hand over it, and yeah, impressions start happening. Things start occurring for you because that was the one competition that you did not compete in was remote viewing out of

S

Speaker 3 37:55

sort of light.

S

Speaker 2 37:56

And there was there was dowsing. There was psychokinesis. There was mind sight and precognition; the other being remote viewing. So five disciplines and a couple competitions, big one, then a then a remainder competition for each one. But I'm very interested to hear how this works for you, how data comes into you because for me it comes through very emotionally through through empathic means and then aside from that, like I said, I lean on remote viewing and the idea of synesthesia. So how does this information come in for you for these different disciplines?

You're saying all the right things, man. So you're on the right track for sure. You know, and I just want to start off by saying this section of it. I think everybody gets there a different way, man. Everybody experiences a little bit different. Like I know I'm probably the only dude that trains mind sight in the dark. Like we train with the lasers, and I have them going on now. So if you see everything strobing in the background, like you know, we we train with all this distraction, but I think that kind of helps in the end. But I know, like you know, Dalia and their crew might train completely different than Rob Friedman and his crew, and just you know the average Joe who's trying to pick it up off videos. You know, we all we all train a little bit different, so I think everybody can kind of get there in their own way. But you know, for me, they're all related, dude, and it really comes from that emotional place. You know, when I describe it to people as that moment when you're so angry and you can just feel it in your heart, you get that moment right, and and and or that moment where we saw our kids on the stage doing the mind sight, and they're saying all these nice things, and we have that moment in our heart where it's just so much happiness, and it's like it becomes almost to the point of like overwhelming and whatever that emotion is, right? If you can learn to kind of harness that emotion and not lose it, but be able to kind of channel it, man, that's that's psychokinesis one and one. I'm telling you, that's anybody that watched me during the side games this year or last year, but specifically this year, you know, if they had the camera on me, I was crying. My son was cheering for me. I wasn't moving my hands dramatically, but it kept flowing through because for me, that that that emotion is what really helps the the overdrive kick in for all these emotion or for all these sibilities, right? And so, psychokinesis, 100% for me is is emotional, all emotion, dude. Being able to affect random number generators like the Weirtoscope or the the social RV game that they made for psychokinesis, being able to affect lottery machines, I have a pretty amazing history of gambling in Vegas. But being able to affect things with your energy, man, is that's all emotion. And even the bikes, you know, I use these bigger analogies so people understand how you could use a practicality, right? Like precog, man. We, you know in the games we were doing the lottery, which once again I'm pretty good at. I I did not do as well this year as I thought I was going to do. I tried to say you canesis those those darn ping pong balls out of that machine, but it didn't work. But you know we train with like you know people ask how it comes. It comes with these emotions. It comes with just knowing, right? And and when you're in some of these masks that these scientists are wanting you to get into, you know, if you're not comfortable with yourself and there is nothing else happening, stimuli going on other than what you have in your head, you know, it it could take you to a lot of weird places. But it's it's focused intention. It's it's knowing that you're doing this for your family, you're doing this for yourself, you're doing this to grow, you're doing this all these different heart-based things. For me, is what I tell myself when I'm trying to do these things or lead up into it, and and it comes, you know what I mean? It comes a lot easier. It's not always clear and perfect and amazing, but it usually comes and produces. And I just you know you know anybody that watches my videos, I show people how you can train pre cog, how you can train remote viewing. There's you know I think there's many different ways of remote viewing now that are kind of coming into their own.

S

Speaker 3 42:13

We got all these different versions of that, and I think even you know Mindsight kind of has you know it's it's separate categories now of like intuitive and then like real time. I think as we're getting more into this this consciousness culture, things are kind of you know kind of making their own way and kind of finding their own path. And it's it's it's just been amazing, man. The it's it's been a little bit scary, kind of putting myself out there, straight honesty. Yeah, you know, because I do show a lot of emotion. I show my kids emotions. I, I once again, man, I wear my heart on my sleeve. Good or you have to,

S

Speaker 2 42:46

you have to,

S

Speaker 3 42:48

and you have to, man. Because I want, I want people to know it's real. So when they see me do something amazing, they're not like it's magic or he's doing it. I, I show my whole process. I show the tables. I show the cards. I show everything, and then I do it for people in person using the exact same stuff, you know. And you guys saw. I mean, it's yeah. I go to these places to show it, and and and and it's not just to say it's me, man. It's just to, I'm I'm I'm the I'm the inspiration, man. And and and the movement is the point. The movement is the goal. The the making it so that we can't be lied to, you know, there wouldn't be any need for conspiracy if we had telepathy. And I think, I think, kind of the overwhelming, the overwhelming part of what people are really wanting to see is they're wanting to see the dude that can predict the future, or gal, or whoever it might be, or and the person that can do real telepathy. And I think you're talking about empathy. You know, I don't think telepathy is reading people's minds. I think it's just being able to read their energy, man, to the point where you're just so in tune with where they are. You're thinking the exact same thing because you're in the exact same mindset, right? Yeah,

S

Speaker 2 43:52

yeah. No, absolutely, absolutely. And and it is, it's interesting because you you brought up a couple of points that that we got into, and that we've gotten into in the past, specifically with remote viewing. A yes, numerous different modalities and disciplines to the point that they are defined as different modalities and disciplines because while while they lean on protocolled CRV controlled remote viewing, they follow different things. They don't necessarily have a blind target like CRV does. That kind of stuff.

S

Speaker 3 44:27

Just to fill this in, so people get the secondary reference. You know, there's motocross ride or dirt bike riding in general, which is the big ride. But then you have supercross and arena cross, and you have all these different versions with the exact same bikes, right? And so for folks that may not know, listen to me, but may not know all the stuff. He's saying that it's all the same, but it's different expressions of the same modality. Yeah, different different forms,

S

Speaker 2 44:51

different forms, slightly different rules, even.

S

Speaker 3 44:54

Yes,

S

Speaker 2 44:55

you know all that kind of stuff. So and. And it's fascinating because one of the things that we got into with with Chase McCarty of Social RV was was the whole idea of ARV, Associative Remote Viewing, the binary concept of a coin flip, yes or no stock options, and and even the weird anomaly of you can paper trade all day with ARV, and the numbers are there, and they show, and it's great, and it's good results. The minute you put money down, it changes it, and it's weird. It's just this weird anomaly in the data set, where once you put it to practical use of making money and profit from it, it's like it won't let you do it. And it's it's weird. It's it's a totally weird anomaly in the data set, but it's a truism, and it's it's there, and it's it's shown in data, and it's it's funky because, like you said, during during the precognitive part, you tried PKing the balls that you wanted up to the top, but but it wouldn't let you do it. It it morally wouldn't let you do it in that kind of way, and it's it's because you totally. It's not that you can't PK. You can PK better than anybody. You won PK

S

Speaker 4 46:28

two years. Two years, dude.

S

Speaker 3 46:31

It's. I think. I here's here's my two cents on it, dude.

S

Speaker 2 46:35

Yeah, yeah. Go ahead.

S

Speaker 3 46:36

I've had my biggest nights in Vegas when it's a group of like me and like my race team and my family, we would have even have these big family reunions, and it's like up to like you know 25 people of my family, and I would have these amazing nights, and we'd all go out to these fancy dinners, and I would pay for everything, and I wasn't really paying for it. The night was creating itself, right? And you know when when I would then go back after it, everybody's in bed. I would lose anything else I put in. Just for folks to know, when you win, say \$80,000, if you can go away, 80,000 up and walk away. Still paying taxes on that 80. The people that just think it doesn't work like that, it totally does. That's that's real life version of damnation. Well, but

S

Speaker 2 47:20

at the same token, it's also the fact of you were doing it just to have fun at that moment. You weren't doing it for the focused purpose of gambling.

S

Speaker 3 47:30

You got it, man. And it was an entangled

S

Speaker 2 47:34

moment between everybody in the universe. So you know, let's build the energy. Let's make something happen.

S

Speaker 3 47:40

Exactly. I think. I think the universe is. It's like, dude, we're gonna send a little bit extra towards this person. They want to make sure they're using it in the right way. Their heart's in the right place, right? And 100% of what you just said, man. When your heart's in the right place, I always say your heart matches your words, matches your actions. That's where I wear my heart on my sleeve. Like, what you see is what you get. You know, it's it's it's it's an amazing thing because when you just live authentically like that, I think the universe just wants to to work for you, right? Like, yeah, it's like you know, if we're gonna send it, you know, some way to send it to the dude that's that's doing it the right way. It's it's not deceitful. It's not for personal gain. It's man, he's gonna have his family have this night to remember if we send it this way, that's dude. Don't send him like 25 Gs on the on the machine, and he's not going to know what to do with his life for

S

Speaker 2 48:28

the next two days. You know what I mean? Yeah, yeah. Well, and and especially that idea of once again doing it to show off, or or doing it as a grounded purpose, you know, and something with a mission, and I think that there is something hugely to be said about that because,

S

Speaker 3 48:47

dude, my whole life for the last year is exactly that, man. I feel like anytime I try to veer off, and you know, we we I've been selling retail at some of the events just to try to make some of the money back because we're just trying to break even on things, and you know, it's it's it's. I don't think I would be in this position if I was being deceitful. You know what I mean? I don't think I would be in this position in my life in general. You know, with between the racing and my family, and just you know, the straight up blessed life I've been able to live. I think is a lot because I live authentically, and I'm for the most part dependable. Probably a little bit less dependable on this last like month because I've been all over the board just trying to get all these things for side games and these events and contact in the desert and the intuitive and all that like kind of came all at once. But man, I I appreciate people like you too, man. Because don't get me wrong, I want the skeptics. I think, dude, I I need a reason. Don't get me wrong, you know what I mean? Like I'm I'm a competitor, right? Like I wouldn't have signed up for the side games just to show I came because I knew if it was a competition and a cod, you could change the world and what you would show. Like if I, you know, straight honestly, if I if I knew back then when I signed up that I could show that these things are available, I would be showing all these people the ways to train it, dude. So many people came up to me at the games just saying how inspirational I was, and that was, dude, that that made me cry like so many times. My my son made me cry, but the dude the and then the competitor in it that was like, dude, I'm coming for you next year, and it was like on the on the big stage at the end on Sunday, like that was the moment I was waiting for because it's like, dude, you you inspire people, you hit the right buttons, you're doing the right thing, just keep being you, be authentic, you know, and it's I can't even tell you, man. It's exactly what you just said. When it comes from the place of love, heart matches words, matches actions. I think the universe wants to give you that extra little oomph of of you know butterfly effect air to help you get you over the ledge to to where you could be. You know, and don't get me wrong. It took a ton of time, energy, and effort. Tons of time to you know thinking about how we're gonna do the games? Setting up, you know. I didn't have any sort of. I I would do my races on YouTube, but we didn't have like the cameras or the laptops to do any of the stuff that we do now. And you know, it's

S

Speaker 2 51:10

well,

S

Speaker 3 51:11

it's it's just been a ride, man. And I I just am so grateful. I just to to to keep piggybacking on what we're saying on, and I'll be done with it, man. I'm I'm so grateful to everyone. I just want to take a moment to say I'm grateful to you to have me on. I'm grateful to every podcaster that's had me on. I'm so beyond grateful to Hakeem and that executive team. I mean, I'm friends with all of them, dude. I just want to give a shout out to David and man, driving all those people on that thing was a little bit hard. I'm just saying, but you know the you know because I wasn't expecting those big old bands. I was expecting like a band, anyways. But you know, like it's it's just it's it's an amazing group, and you're motivated, right? You're motivated to help that keep growing because it's just such an amazing thing, and the people that are making it are what are what really are putting the icing on the cake to this amazing event and this amazing movement, man. It's a movement. It is. It is. It

S

Speaker 2 52:04

is. And you know, especially whenever you're talking about purpose, whenever you're talking about doing these things with purpose, Ryan. It is. I think that's probably after years of teaching spirituality to junior high, high school students, young adults, things like that-the idea of alignment, not even manifestation, not even manifest, because manifestation's easy. Honestly, it's it's pushing the slinky. That once once once you're aligned, the manifestation isn't hard. The hard part is getting yourself aligned with the point of manifestation. It's it's getting yourself aligned to the point. Even even whenever you're talking about training with things like this, when I'm sticking something to the wall, I have to align myself with that object, and with the intent of why I'm sticking it to the wall. Not about proving it to somebody. Not about proving it to myself. I have to align myself to the fact of not not this might stick to the wall. Man, I hope this happens. It is truly that yodek concept of you do or you do not. There is no try. The second that you say I'm gonna try, you've already doubted. You failed like immediately. You failed. You put up like you allowed a brick to get in your way. You may as well build a wall,

dude. That analogy is amazing. I'm going to start using that brick analogy. I love that. Yeah, but it's for me. It's the analogy of you don't want to come up short on the 120 foot triple, man. Just there's a moment where you just switch it off, and you're like, this is going to happen. Do or do not. You're you're if you're not making this, you're in a bad place, man. So send it. You know, full throttle, focus, all of it, and let's get over it. And that's one more, you know, thing that we now have under our belt, you know. And and you know, it's weird for me to some degree, just straight honestly, man. I'm a heart on my sleeve guy. I I am this. I I don't think the moto in me is ever going to change. You know, you just showed that picture of me. I'm even doing it kind of X Games style. You know, I don't. I don't think the com the competitor in me is probably going to change too too much. That's just that's that's super deep in my in my soul. But you know, for me, it's that reason, man. And and and the the reason isn't to send the 120 foot jump to show off to everybody to be like, look at Ryan. The reason to send the 120 foot jump is that there's going to be a kid or my kid or or your kid or or an adult out there that's going to be like, dude, I can do 140. There's going to be a dude that you know there's even you sitting out there just going to see what I'm saying. You know what I'm saying, and that's that's the goal, man. Because if if in my lifetime we can accept. This is really part of it, and stop thinking that we can't, and start thinking about how we can, and then start applying this and teaching it, and and and and being able to, you know, the easiest way to test telepathy. I'm not, I'm not a secrets guy, man. If you want to really learn how to train telepathy with a friend, have a friend roll a dice in a separate room. Be like we are on a computer. Have them write that number on a dry erase board that you cannot see, and have that try to send it to that person. Do that 15 times in a row. What I can tell you is, our group of psychic folks that we train with, we we've done that many many times, and our group is so connected. We we know when one of us is sick or off? Yeah, you know what I mean. And and and it's the same way that like a mom knows the the schedule or when something's off with a kid. Just because you are so connected with that person, it's not that you're reading their mind. It's that you're just in that moment with that person, giving your giving them that the time and focus of yourself that you're then able to be like, oh man, they seem like they're a little bit down today, or you know, you're you're just you're you're having that connection, man. And when you can learn how to like, I can have a connection with that person and that person, and I'm going to refine that connection to this room, and you can kind of get extra sensory in. It becomes an overload sometimes, but it it can help. You know, in practical application, it can help de elevate crisis. Yeah, it can help you know have better outcomes. It's just there's real ways of applying this stuff that are not mystical. That I just wish people would kind of get over this hump of of woo woo and get into the like you know if if I if I am in a dark place, and I'm, or I'm in a bad situation where I don't have all my vision. And man, if I can be aware of my surroundings, I've just changed my my likelihood of having a more successful outcome than I am, you know, running into things or being in a less safe situation. I just, it's it's so much bigger than me, man. And being a part of this and part of this movement, and dude, dog is teaching blind people to see.

S

Speaker 3 57:02

Mic drop, you know what I mean? Like mic drop. Anybody that's there, and I've met Sean and Justin, and they're legit, dude. Sean or Sean can take out both of his eyes because they're prosthetics. You know what I mean? When this dude's doing his thing on on stage, and especially with other things that I've seen, it's like I want to take every hater and just have them shake his hand and have his other hand have his eyes in it,

S

Speaker 2 57:30

yeah, and

S

Speaker 3 57:30

be like, now say, now keep saying what you're saying to all these other folks, man, and

S

Speaker 2 57:34

now say now say he memorized where your hand was.

S

Speaker 3 57:38

Yeah, exactly. The nonsense quoted because when when you meet these people and you know their hearts, man, I am more motivated than ever to to keep this going and keep it being legit, keeping the science moving. You know, I don't want I don't you know X X Games is my favorite thing, dude. I and if you were seeing that this this happens the side and like movie props and stuff. That side's all dirt bikes and bicycles. Like I want to keep progressing. I want to help being a person that keeps setting this bar, so that we can get to that person that can levitate. That we can get to that person that maybe has 100% accuracy to the point that they they help change the world in some positive way. And the last thing I want to say too is I love Aki Mistler, and and I've not given enough shout out to him, man. I I think he's an intelligent dude. I think he's an amazing human being in terms of all the things he's accomplished and done. And man, one thing he strives to all of us perceptualists the most, especially you know us that are returning and now are kind of putting things out there. You know it comes from this heart base, this acceptance base. It's not that it's just us; it's that everybody can do it. It puts these really good ethics in place that help guide, at least for me, you know what I do with this. And and I and and I know he knows I mean it. I know that other perceptualists mean it. Like we want to help. You know, we want to be the Jedi, and I do think, you know, I think there is is there is man. If if you train it and you had bad intentions to it, and you could figure out how to make that bad intentions work, you know, I'm not going to lie and say that I've had moments where I've been so angry, man. It's it's like I'm the Hulk, and I won't say exactly what happened. But dude, I've I'm I'm about 180 pounds, maybe five nine, at in tall shoes. You know what I mean? But dude, I've literally in my moments of just craziness, I've literally lifted cars by myself, a Volkswagen Rabbit specifically, and like I've I've literally tore trees from the ground, like just because I've had these moments. I don't know if that's specifically me in the PK or whatever, but you know, just being able to have these moments where you're just you're so emotional, man. If you have a person that doesn't know how to control that in the right way and has these extra. Yeah, you know, I'm just saying you could be you could be on the dark side, and and and the whole point is to inspire people to be doing it the right way, the ethical way. I'm not trying to read everybody. I'm not trying to remote you in your house. Yeah,

S

Speaker 2 1:00:12

you know, no, and you know that's something that I bring up regularly is is the safeties, the ethics that happens with all of these doesn't matter if it's dousing somebody's property for water. Yeah, the ethics involved with all of them is just out of control, out of pocket. Even to the point that with the military-controlled remote viewing program, the first rule was you do not interfere. You like it was very Star Trek in its way of like you do not interfere, you do not influence. That's that's not what this is for. And it was it was fascinating to see that. I echo that all the time. The fact of like there it was being used by the CIA and the military, and the first rule was you do no harm. We aren't there to stop somebody's heart remotely. We like that's not what this is for and about, you know. And it's fascinating just to bring it full circle, Ryan. It is. I love talking with people like you, who are passionate about this, who are experiencers, who are people who have had an inkling in this their whole life and have just been emboldened to come forward to come out with this and to share their gifts with the world and to tell the whole world like you're telling your son, like my son was taught this weekend, we can all do this. There's, there. I mean, I'd love to say there's something truly special about you, Ryan. Yeah, just to be your

S

Speaker 3 1:01:51

head at the moment. the the The

S

Speaker 2 1:01:52

fact is, you're just you're just one of the many that is on the front blade of the spear that is coming out into this world to show everybody that this is an innate quality. This is something that exists in all of us. I went through zero special training, everybody. Zero. I sat with Kimla and David at an intensive here in Austin for a few days, but aside from that, like they gave me a coin and they said, "Put this on the wall and believe it's going to stick, and it stuck. Like I don't, I don't know what else to say about it. I'd love to say that there was like you know an intensive hour and a half of this is how you make the coin stick. There, there was 0% of that. None,

S

Speaker 3 1:02:45

dude. It's flow. It's flow state and having that childish kind of like, dude. Yeah, dude. For every championship, there is you know every time. I just want people to know that's why I post up as well. For every one of my amazing sizzle reels, there's about 45 minutes of like just plowing through, and it's not amazing, right? For every Moto Championship, there's a there's literally been 100/5 places, you know what I mean? Where it's almost right there, but just not enough enough to keep me motivated, not enough to discourage me. But

S

Speaker 2 1:03:15

yeah,

S

Speaker 3 1:03:15

you know, it's it's it's it's it is, man. It's all of us, and I think when we all realize that we're all capable of this, we all, dude. I call them shrimp moments. We all have that moment where it changes us. It touches us. It touches our heart to us. Be like, well, maybe, dude. Sticking the stuff on the walls, or or you know, the the center card call out, or having your windows open for the first time, or or any of these things, man. You just need that one experience, and it's it's it's it's it's just going to change your life, man. It's it may not it may not change it completely if you don't give it the time, energy, and effort. But man, it's just just for people to know it's real. You know what I mean? And don't get me wrong. When when if you sit here and you do it all day, you're going to be a lot more accurate than if you only do it maybe once a month, kind of thing, but it just to know, acknowledge it, to acknowledge that there's these people that are around world training. Man, we we we had the five categories in the side game, but dude, I met I met so many people that it's like, man, how how could you categorize what I just saw that was so amazing that this person did, you know what I mean? Like,

S

Speaker 2 1:04:23

and you know, really, it is. I did the one thing that rings through my head more than anything on these weekends, Ryan. As a former Catholic seminarian, former youth minister, Matthew 18 is what comes to my head regularly. Truly, I tell you, unless you change and become like children, you will never enter the kingdom of heaven. The idea that a child, and what this roots to, is just the idea that children do not hate by nature. They don't. Guy, girl, guy dressed as a girl, 0% until you have taught them to hate. Until it doesn't matter the color, the creed, what somebody believes, there is 0% hate in a child's heart. That is something that we've learned. There is a purity to thought, a purity of heart with a child that exists. I'm weeping right now,

S

Speaker 3 1:05:28

dude. And literally, I'm like, dude, you're supposed to make me cry on podcasts. But that's

S

Speaker 1 1:05:34

just it.

S

Speaker 3 1:05:35

We lose. We lose 100.

S

Speaker 2 1:05:38

And and when you when you that that's how that's that's how Angela Thompson Smith taught me to bend this spoon. That's how I bent my first spoon. Was was being at one with a childlike point of joy, and that's what she told me. She was like, "Remember a point as a child where you were utterly joyous about something, anything doesn't matter. Connect with that and invite that spoon to be a part of that moment with you. That's how I was taught to be. My

S

Speaker 3 1:06:11

screen is blowing up because you made me cry.

S

Speaker 2 1:06:15

But but quite literally, it's it's one of those. We have to learn to trust. We have to learn to trust ourselves. We have to learn to trust our inner nature again. We have to learn to trust that pull to what we know is right, and and to what we can naturally do. Because once again, you you are amazing at being 100% natural, Ryan, and you practice at being 100% natural, and it shows, and it shows through your skills. It shows through your skills on stage. It shows through your child, through your family, through the love that you give to the world around you. So I want to thank you for everything that you are doing. I want to thank you for everything that you are bringing to this community because it truly does take a community to get this across and to change humanity in that kind of way. So, thank you for being a beautiful part of it. Let everybody know where they can go to to follow you, where they can come to be a part of the Star Watch parties, where they can come for training or even advice.

S**Speaker 3 1:07:20**

Just give advice. That made me cry a little bit because it is man. I'm just thinking, man, it just was so powerful. And then these, dude, I won't get onto it because I'll start rambling again. But you can catch me at monstrous on Instagram. It's monstrous nightmare 1234. Social media. If you like, literally, if you just Google search my name, you'll see all the different things I've done on YouTube. If you look up Rhino Pit Monster Sightman Racing, I'm on YouTube with my own channel. It's still a lot of dirt bikes. I haven't put a ton of the size stuff, but exactly. And then Lights Over Loveland, their podcast has captured a lot of our events. We've been working a lot with Colorado Stargazing 369. You could look up any of those things, and I'm sure you'll find it somewhere. Man, I I just want to say thank you to having me on, and man, giving me that moment there at the end because it it is man. It's it's it's going to be the fact that we you know we don't all have to agree with each other. Not every single kid likes each other just by knowing each other, you know. But nobody comes with this bias of hate, man. Unconditional positive regard. This this this moment of realizing that we're all human. We're all doing this for the first time, and that we're all connected. We're we're all the same thing, just experiencing it differently. And if we can realize what it might be like to be in somebody else's experience-it changes everything. Empathy, man-you-you said all the right words. Like I, and in it with me crying. This is the favorite episode. I love this.

S

Speaker 2 1:08:52

Well, that's what it's all about, man. Is real, true, and you are definitely that, my friends. So thank you so much once again for your time today. Thank you so much for all you do. We've got to have you on again and again, and we've definitely got to keep the kids connected for the future. For sure, man. Hold the line real quick while we close things out for this segment, Ryan. While you are online, everybody checking out everything from our good friend Ryan Debbian. Make sure to stop on by Curious Realm. curiousrealm.com is where you can like, follow, subscribe. That's where you can find all of our on-site coverage from amazing events like SciGames and Mufon coming up at the end of the month. You can also find your link to Curious Research in the Field Observation Log when we come back from this quick commercial break, everybody. We will be joined by our good friend Dennis Stone, owner of America Stonehenge. We will be talking about this mysterious location nestled in New Hampshire, its archaeoastronomic alignments, and so much more. Right after this, everybody. The key to good science is good research. At the heart of good research is a good data set. With the field observation and encounter log from Curious Research, you can easily keep track of your investigative information all in one place, making it easier to review cases and readily see comparisons and contrasts between them, whether out in the woods squatching in a back room gathering EVPs or using high-tech gear to track UFO UAP activity, this easy-to-carry pocket-sized scientific data log is the perfect companion for any field researcher. You can find your copy of the Curious Research Field Observation and Encounter log at Amazon.com, or visit the official Curious Realm store at curiousrealm.com/store to reserve your copy for yourself, your family, or a mind that you want to open. That website again is curiousrealm.com forward slash store. Well, hello everybody, and welcome back from that quick break. Thank you so much for staying with us. Also, thank you so much to our sponsors, especially True Hemp Science. If you're a user of CBD products like I am, folks, stop on by TrueHimpScience.com today. Christopher Lynch and True Hemp Science use a spygeric process where every part of the hemp plant is used. That's every part. That seeds, stems, buds, roots, fibers, every part is used, combusted, and reused, and that process followed time and time again till nothing remains but an amazing spideric product, complete with terpene profiles and all. Stop on by and check them out, everybody. TrueHimScience.com is the website that you want to go to. Curious Seven is the code that you want to use to save 7% off your entire cart of \$50 or more, and get free edibles on the way out the door. Our guest in this segment is the amazing Dennis Stone. He is the owner of America's Stonehenge. His family has owned this property for better than 50 years now, and the work that they have done and amassed at this location is fantastic. I mean, it's one of those. Dennis, welcome back to the show, number one. Give me, give me just a second. I just had an issue with my headphones. I have to go to my backup line. There we go. But but your family has owned this property since you were a child. How did you first come to own the property, and how have the renovations? How did they begin, and where have they gone since?

Speaker 4 1:13:05

Well, good evening, Chris. Thank you so much for having me on the site again. It's so wonderful to see you and talk with you again. And looking for your next visit up to New England and stopping by and maybe doing a little video up there, a little podcast. Be wonderful. Yeah, it's been actually it's been closer to 70 years, actually 71 years. My dad first visited the site back in 55 because of a radio show. You know, it was WBZ Boston, big big station in New England, AM station, and a Friday night. Just heard about it. I'd never heard about the place before, and just was fascinated by the topic. And the show host was Alton Hall Blackington from the state of Maine. You might know where Maine is, I think, and that was his. That's where he was from, and he would be on this Boston station, and it was syndicated in Maine too. You know, in different places. He eventually saw the site a few days later with my aunt and uncle, who used to come down here back in the '30s picnicking. You know, so my mom's sister and her husband, and they had forgotten completely about their bicycle trips back in the '30s, where they were dating. You know, I'm sure it just slipped their mind over the decades. But by 1955, he brought this magazine home from the barber shop, which was another big coincidence right after the radio show. He goes to a barber shop. He's waiting to have his hair. Opens up a New Hampshire Profile magazine, and it's kind of like Yankees big magazine in New England. This is a New Hampshire Profile, but this time there's pictures. You can see what it looks like, and there's a whole feature article. Totally excited him, and that was right after the the radio show. And then he goes to my aunt and uncle's to play cards on a Saturday night with about 10 people. Passes the magazine around. Nobody knows what it is until my aunt and uncle saw it, and it's like, oh. So that Sunday they went down, checked the site out. After looking for it, it was not open to the public. There was no Google Maps, there was no road signs, and there was no visitor center, no parking lot. It was just an old road that went on top of the hill. They took a chance and parked there, basically walked up a half. Mile when they got on top, there's the site. They were just blown away by it, basically trespassing too, because it was all private property. My dad climbed under the chain link fence and spent quite a bit of time looking around, just fascinated by the stone structures. Never seen anything like that. When he came back out under the fence, he snuck under the fence. The fence was put up in 1937 by the first researcher archeologist, mr. Goodwin from Hartford, Connecticut. It's still there today, 90 years later. But he climbed under the fence. It had barbed wire on the top. It's still there today too. He wanted to protect the site from vandalism, so that fence has served its purpose for 90 years, and he was just amazed. And he said to everybody, you know, it's just the most mind-boggling thing I've ever seen. I've never, you know, it's a, it's all these stone ruins and huge stone slabs, chambers, you know, a courtyard, plaza, all. And then he goes something about he'd like to open the site up to the public, maybe as an attraction or museum, because my mom said you got rocks in your head, you know, and and and I think he did. He just he didn't he didn't that didn't deter him. He just went forward with the whole thing. And at that time, he I was a baby. My sister was on her way at that moment, and they had built a new home, and they were still building it. They built it themselves with a couple of relatives, and my dad had a new AT and T Bell Labs job, and he was there for 30 years, but he just got out of the Coast Guard, and he was up in Labrador, right near the Viking site. Actually, that's in Newfoundland. He was right across the bay from that Lonzo Meadow site.

S

Speaker 5 1:16:30

Oh wow!

S

Speaker 4 1:16:30

And that fascinated him. But he was there too early because the discovery of that was about 1960, and he got out of there by '53. He was up there for a while working the Loran stations up there, and he was attending college, so he had a lot of stuff on his plate. My mom's like, "You're crazy, you know. We got enough stuff going on. You know, my sister was on her way, but he met the owner in the site, and over the next three years, till 1958, they worked on an agreement and they opened it up as the Stone Ruins of New Hampshire in 1958 on the summer solstice. It was a soft, coincidentally, because we didn't know anything about the astronomy of the summer. Yeah, yeah. But it was it was a soft opening, and a couple weeks later, on the I think it was July 11 to 12th. I'm always mixing. I should look at my book. It was the official opening, and the governor showed up, and the governor's name always escapes me because he had a very, I think, a strange last name. But he showed up, which is wonderful. He's only the second governor, I think, to ever visit our site.

S

Speaker 2 1:17:29

Oh wow, we know

S

Speaker 4 1:17:30

of that we're aware of. And he was there for the opening, so we've been open coming up. Let's see, we're in 2026. So in 2028 we'll have our 70th year open to the public.

S

Speaker 5 1:17:45

Wow!

S

Speaker 4 1:17:46

Where's the time go? I can still remember. That is that is

S

Speaker 2 1:17:50

fascinating, man. Just 70 years to be open, and that is that is true Americana. That's true American history right there. That is that is from the beginning of family road trips. This place has been around.

S

Speaker 4 1:18:06

Yeah, you know exactly. And that's that's that is

S

Speaker 2 1:18:09

wild to think about, Dennis. And quite honestly, I think your dad and my dad should get together and go bowling because that honestly sounds like something my dad would do. Like hear hear about oh man this but I heard about this place on a radio show like three blocks away from my house never even knew it was there I wonder if I could buy that and open it up you know yeah exactly

S

Speaker 4 1:18:31

yeah yeah exactly open it up I mean it sounds kind of crazy I guess my dad actually was in a bowling league and he played baseball at AT and T Bell Labs. They had a huge campus there. Today is where Amazon and Andover. Yeah, yeah. You know, part of it, but it was a huge campus with between 10 and 20,000 people, depending of the era. And Bell Laboratories was there. My dad got the fortune to work in Bell Labs, which was pretty kind of prestigious. He wasn't always in Bell Labs, but he he did work in there. And when he was yeah, he didn't want to get out of that lab. It was so interesting, you know. But so then he would just move over, you know, down the hall a few 100 feet to his wherever the office was he was working at. But he was there 30 years, and so he ran the business on the side, and my mom helped out, and we were just little kids, of course. My dad passed away in '09, you know, so it kind of fell into my lap, and my wife, you know, my sister actually kind of was involved with it a little bit over the years. She was a nurse, and she loved making pottery. We sold some of her pottery at our museum, everything. But she passed away in 2012 from cancer, just going on 56. You know, it was right after my dad passed. You know, so it's just me. I'm the only one left, and my mom, my mom passed away in 19 at almost 100 years old, 16 days short for 100th birthday.

S

Speaker 2 1:19:51

Yeah, so you know, thinking about that, Dennis, because that is, it's amazing to think that he got to see that. Much of the longevity of the site that he got to see that much of the dig process and progress over the years that he's gotten to see. I mean, I mean, he got to see everything up to the drone photos that we have that we're going to be showing in a second. He got to see astroarchaeological alignments. Like even even once again, to to think about my dad running across something like this, just driving down the road and going, ah man, that's a beautiful piece of property. I want to do something with that, you know. And then finding all this, um, what an amazing piece of happenstance to begin with. Once again, to have heard about something on a show, become become enthused and enthralled by it, purchase the property, and then come to find out that it's a massive swath of property. Let's start getting into these pictures because this is this is a big piece of property that this that this encompasses, and when you start looking, like once again, there's just this regular guy who sees a piece of property, some interesting structures on it, and goes, you know, maybe we should open that up as like a roadside attraction. Little does he know that there's like major astro archeological alignments on this property.

Yeah, they didn't know. They didn't know when they first got there. It wasn't until 65 they actually got involved with the astronomy. But before that, in 1959, the Saturday Evening Post had a feature article on our second year we were open, which was wonderful. You know, to have a major magazine and still around today, I think I googled that. It's still, but it was so so major, and it was wonderful. Everybody looked forward to it. They had those real. I think at the artist, they always had those beautiful covers. But we have that actual magazine, like we still have the New Hampshire Profile magazine too, from '53. So six years later, a different author came along and wrote us up in '59, and the gentleman referred to the site as a Stonehenge of America. You know, just oh no, excuse me, it was America Stonehenge, and it's like wow. So it's kind of a little bit of a nickname, not used very much in the '60s until the astronomy work, and then people recalled this America Stonehenge, but primarily because 65 was in Gerald Hopkins. He was from England originally. Worked at the Harvard Smithsonian Center for Astrophysics, and I believe he was either at BU or BC. I think it could have been BU. I always get those two universities in Boston picked up, and he was a professor of hockey astronomy, and he wrote about Stonehenge and said Stonehenge is a computer, so the book was called Stonehenge Decoded, and that same year in '65, when the book came out, he had wrote a paper in '63, I guess the same, you know, a paper on this too, and then he made it into a book, and we sold the book in our gift shop for years. But CBS did a special called "The Mysteries of Stonehenge. I saw it once in '65 when it came out, and in the '70s, my cousin and some of the staff members at America Stonehenge. We decided to go over to the Nashua, New Hampshire library. I believe it was 50 over 50 years ago, and for some reason we knew we could watch it over there. You know, and we did. I mean, it's different now. You can probably pull it up on YouTube, I guess. But that really got my dad all the researchers interested, and what are those stones that are standing up, surrounding the main site out in the woods? They look like big arrowheads standing up. Some of them are laying on their side, but obviously they were standing up. What was their purpose, if there was any purpose? And so they started thinking about maybe they're aligned with something like the sun or moon, perhaps. Like there's the summer's winter solstice sunset. You can see it's kind of arrowhead shape, and you have to have two markers to have an alignment. You have to have two fixed markers. You made out of stone, wood, or whatever your concrete, whatever you want. You can't have just one point, otherwise you can make every day of the year by just walking around it. You know, and there is an astronomical center, and one of the earlier photographs you showed, everything coming to a center, and today we have about 57 alignments with the sun, moon, and stars that we're aware of. That's right there. You can see where everything comes together, and they come together where there used to be two piles of rocks we call karnes, and mr. Goodwin photographed them. He diagrammed them in the 1930 s. He could not figure out what the devil their purpose was. They seemed to be significant, and yet he couldn't determine anything about them. He thought they were hollow beehive chambers, like what the Irish monks used in Ireland. He thought they were connected to the Oracle chamber, and they were not. So what he did eventually, when they decided they were solid stone piles side by side, is to use some of that rock to rebuild the ramp near the sacrificial table. We have pictures of a three-legged tripod. I guess three redundant, but a tripod made out of wood with a a winch on top with a handle with a cable, and they were lifting up the rocks from those.

S

Speaker 4 1:24:59

Files in the late 30s, rebuilding the ramp, which is you can see the sacrificial table out of the frame to the right is where he was putting the stones into there today. He basically destroyed what we call the astronomical center today. But what he did discover, Chris, is below the two of these cons, and they were side by side. He found out where that table originally was quarried from by the original builders. There's actually a bell shape, like the shape of the table, a bell shape in the bedrock, and there's a big piece of something missing there, and that is where the table originated from. They were able to quarry it out of the bedrock, and they moved it about 40 feet, set it up on its four legs, and it weighs about 9,000 pounds. So they there's the the bad and the good were the bad was they destroyed our astronomical center, and 40 years later we we determined that during our survey in the early 70 s. The the good thing is we found out the table actually had a a quarry socket, and you could see it once the two cons were removed. So there's an astronomical center to the site, and that's when all that astronomy took off in 6567, We got the first picture of the sun setting on the winter solstice. You showed a recent picture of that, and you know, and today we have 57 alignments, and that's summer solstice. You can see that's that's the winter solstice. You can see the kind of cool looking shape stones. You know, they're part of the bedrock, and somebody think about it. Shade stood them up like that. I don't have the sun setting over there. You can see it's winter, but that is the summer solstice, June 20 or 21st alive. Yeah, I did that in the winter because I thought it was a pretty picture. But in the summertime, you can see the sun setting on it like the winter.

S

Speaker 2 1:26:37

Well, and this site once again, archeologists have been to it, historians have been to it, prehistorians have been to it. Nobody seems to have an answer, Dennis. And it's funny because even even whenever you go back into the histories of the area, things like that. Whenever settlers first came to the area and found it, they asked the the Native American population, "Why'd you build this? They're like, "We didn't build that. That was there when we came here.

Speaker 4 1:27:13

Right, exactly. Yeah, yeah. We've heard all of those stories over the years. 1907, Edgar Gilbert wrote the history of Salem said it's a wonderful place among a soft pine and rough boulders where weird tales may be woven, and that was 1907 when that book came out. We have it; it's a very thick book on Salem, and it talks about this area being sold by two Native Americans to people that became part of Haver, Massachusetts. It was blessed by a very famous Native American chief, past Conaway. He was a very tall gentleman. He lived to be 102 or 120. There's some disagreement, but I think the gentleman was. I think the Native American chief was very well respected by both his tribe, other tribes, and also by the Europeans. You know, and he gave his blessing. And this whole region here was sold for 10 pounds and three shillings, which is not too much money today. But our property is just a small piece of that. It was all Haver, part of Salem, Hampton, Atkinson, and and maybe maybe Bradford, Mass. It's a big, big area. So we go history back to there. But there are you know the legends that some Native Americans thought the place was kind of a taboo place. It wasn't theirs. Somebody else used it, maybe for ceremonial purposes. We've heard those, and if you watch the Holzer Files, it ran from 20 to 22. And Hans Holz, we were on one of the episodes in the second season called Ancient Evil, and they were up here for filming for an entire week. Scott Walters was brought in to do a cameo thing, and it was really cool. They set the whole building up a visitor center as a studio each late afternoon when we closed to the public. They turned it into like a movie studio. It's so cool. But Daryl Jamieson, he's a chief Black Eagle. He's a Wampanoag from around the Plymouth, Massachusetts, that greater area, Cape Cod kind of area. And he came up. He came up in 2015, I think. And he had an episode when he was on the site. He was up here with a couple other people. Might have been Scott Walthas at the time, David Brody, a couple other people. But he had an episode on the site. He lay down. He was having difficulty breathing and other stuff. So when they invited him to come back to be on the show five years later, he says, "Well, I'm not going to go up on that hill. You can you can do my you know interview either down at the visitor center or around it. You know. So they decided to set up an outside studio halfway between the building and the watch house, kind of you know on what's what we call the surface, and so if you watch that show, he'll he's on it and he describes. He says it's not my people that built this, and he goes, "It's a beautiful place out there. He goes, "But I had a bad reaction to it, and he goes on. There's a little bit more information about that. So that's kind of his testimony, you know, that it was his group, and they were, you know, around the Massachusetts Greater Massachusetts area, and they they did travel a Native American either on boats, you know, canoes or dugout canoes or birch canoes, or they went on some of the trails, even Route 28 that goes from Cape Cod to the White Mountains goes right by here, you know, a couple miles away. That was a deer trail, I think. Became a Native American trail, and today it's Route 28, you know. And we have a map with actually other Native American trails on both sides of the hill here. But any of that, Paula Underwood, she was from California. She was Iroquois. She didn't grow up, and that's usually near the Great Lakes, New York area. You know that kind of that that that that tribe. And she wrote Walking People probably 30 years ago. She visited us twice. She held a couple of prayer circles at our site, and he got 10,000 years of history taught to her by her father, I believe. And he had her tell the story back two different ways, so she would have an accurate family history of the old tradition.
